Problems at the supermarket

One day, Tiara and Danny were buying food and drinks at the supermarket.

At the supermarket, Danny wanted to buy a carton of milk and some snacks. Danny asked Tiara, 'How much is a carton of milk?' Tiara said, 'It's four dollars seventy.' 'How much is a bar of chocolate?' 'It's three dollars and fifty', Tiara said. 'How much is it altogether?' Danny asked. 'It's eighteen dollars altogether,' Tiara said.

When they were paying the food, they found out they forgot to bring money, so they had to go back home to get money. Finally they solved the problem. They felt happy.
