My Dream Job

My dream job is a vet. I want to be a vet because I love animals. I don't want to see them hurt or feel uncomfortable. I will work as a veterinary technician or an assistant.

I need to be caring if I want to be a vet because I need to protect public health so that I can rehabilitate stray animals. I also need to be responsible so that I can contribute to researches and education in the field of animal health.

In addition to being caring and responsible, I also need to be patient because I need to provide medical care and diagnosis if I want to be a vet.

I think being a vet is a meaningful job because I can do a lot of meaningful things. Becoming a vet can save some poor, injured pets or stray animals. Every time you save a life, you will have a huge sense of satisfaction and accomplishment. Vet medicine is a very important profession because it saves the lives of many animals.
