My Dream Job

My dream job is to be a world class speedcuber coach. I love cubing and I really want to be fast like the world champion. I will learn advanced tricks like lookahead, ZBLL and etc.

The first requirement of this job is to have deep understanding of the mechanics of the Rubik's cube and be fast because the speedcubers now are all very quick at solving cubes and we need to have deep understanding of the cube so that I can turn the pieces fast and teach my students about these concepts.

The second requirement of this job is to have passion for the sport. You don't just cube for awards or money or even fame, you cube because you like it! A world class speedcuber coach needs to have passion and teach students with the newest strategies.

The third requirement of this job is to be able to inspire and motivate students so that they can reach their full potential and achieve their goals. No jobs are easy and so we need to work hard for our dreams.
