Chaos

Today, Danny and May were having a party, so they needed to buy food and drinks for their friends. They made a long shopping list with everything that they needed for the party and went to the supermarket.

They walked into Golden supermarket and put twenty bags of Flash Nuts, ten bags of delicious Super Chips, two buckets of strawberry ice-cream and twenty-two cans of soda. When they looked at the shopping list, May said” Oh! We missed the salad-dressing.” And they found it on the shelf, which was next to the cashier.

When Danny was about to take the salad dressing, May saw a kid dashing toward Danny, she yelled “Watch out!” The kid almost bumped into Danny. Luckily, Dany dodged him at the right time. They pushed the fully-loaded shopping cart to the cashier. When the staff told them the price, they were shocked, it was so expensive that they didn’t even have enough money to pay.

They walked out from the Golden supermarket with empty hands because the prices were too expensive. They were disappointed but May found a solution. She said maybe they should try to go to the Budget supermarket. When they went there, they found the things there are way cheaper than those in the Golden supermarket. They bought the food there and went to the party just in time.

After this, they learnt to think before the action.
