My Dream Job

Everyone has their own dream job, but mine is to become a doctor. It is because I have a strong desire in helping the people in need. I hope I can bring love and care to the community.

If I become a doctor, I will have a fixed working place. I will work in the hospital. Also, I need to wear a white uniform to work. My job is to help patients to perform operation and give them medicine.

Becoming a doctor won't be easy. I need to be patients' needs. I also need to be hard-working so that I can know more information about medicine. Moreover, I need to have empathy so that I can comfort the patients.

All in all, I think I am suitable to be a doctor because I am a patient, hard-working and caring person. I have to read more science books and search for more information related to medicine knowledge on the internet so to prepare myself to be a doctor.

I hope I can be a doctor one day. I will try my best to make my dream come true.
