My Dream Job

What do you want to be when you grow up? I want to be a doctor in the future. Being a doctor is a meaningful job. I am so proud of them.

If I become a doctor, I will cure sick people and help those in need.

First, doctors need to be hard-working so that they can acquire lots of medical knowledge. Second, they need to be patient so that they can listen to their patients' symptoms. Finally, they need to be attentive so that they can take good care of their patients.

I am suitable for this job because I am caring and willing to help others. I have to study hard and read more medical books to equip myself for this profession.
