Good Manners in Different Places

It is important to have good manners because it can make our society peaceful and harmonious.

First, we should have good manners at the hospital. We need to communicate openly. How can we do that? We can be honest about symptoms and medical history. Also, ask questions about our treatment plan. Besides, we should confirm visiting hours, keep our visit short so to maintain a reasonable number of visitors.

We should also have good manners at the park. We have to keep the park clean. To do that, we shouldn't dispose garbage or spit. If we don't make the park clean, the air in the park will not be fresh. Last but not least, we shouldn't feed or approach wild animals because we need to respect wild life.

To sum up, we should have good manners in different places. If we don't have good manners, our world will be terrible and not peaceful at all. Let's all have good manners to make our society harmonious!
