6P CHENG YAU, Christmas

My Dream Job

I want to be an astronaut when I grow up because I love space and enjoy looking at the stars, planets, and the moon through a telescope. My favourite astronaut is Yang Liwei, and I hope I can be like him one day.

If I become an astronaut, I will feel extremely excited. This is because I will get to play, sleep, eat, and walk while floating inside the spacecraft. It will be so interesting!

However, this job is not easy, so I need to be well-prepared. First, I am going to help my brother with his homework to train my patience. Then, I am going to exercise regularly and eat healthily so that I can stay strong and fit. Also, I am going to study hard to better understand the universe.

I believe I am suitable for this job because I am curious, clever, and confident. To prepare myself from now on, I will search for answers about space by reading more books and doing research online. I really want to be an excellent astronaut in the future, and I hope my dream will come true.
