Problem sharks are facing

I am a friendly shark, and I am writing because my species will become extinct if humans do not stop hunting us.

The first problem we face is overhunting. People hunt us solely for our fins. Very few sharks are left in the sea today, and our numbers will continue to drop unless people stop ordering shark fin soup.

The second problem we are facing is water pollution. People dump plastic and toxic waste into the sea. As a result, a lot of sharks get sick because of this trash. To stop this, people must reduce their use of disposable products.

The third problem we are facing is accidental catching. Fisherman use large nets to catch tuna, but sharks are often caught by accident as well. Many sharks will die or get injured unless people stop buying seafood from disreputable companies.

Please stop hunting us for our fins and meat. If you protect us, we will not become extinct. Act now to save us!
